JUDE DELA CRUZ

Full Stack Developer

0956-130-5511 • judedelacruz2025@gmail.com • Balagtas, Bulacan • dev-judedel.github.io/myportfolio/

PROFILE

Experienced Full Stack Developer with 8+ years of professional experience delivering enterprise-level web and desktop applications. Specialized in Python, PHP, and database-driven systems with strong expertise in system architecture, billing logic, and ERP solutions. Known for analytical problem-solving, attention to detail, and leading development teams to build reliable, scalable, and user-friendly software solutions.

WORK EXPERIENCE

Lead Software Developer *2017 – Present*

Asian Land Strategies Corporation

- Led a team of developers designing and maintaining enterprise-level systems
- Architected full-stack applications using Python, PHP, MySQL, and PostgreSQL
- Designed and optimized databases for performance, accuracy, and scalability
- Translated business requirements into technical solutions and conducted code reviews
- Awarded Supervisor of the Year (2024) and Staff of the Year – Software Developer (2021)

PROJECTS / PORTFOLIO

Enterprise Resource Planning (ERP) System *PHP · MySQL*

- Led development of custom internal ERP using Native PHP and MySQL
- Architected core modules: Inventory, CRM with advanced payment/interest logic
- Coordinated 4-developer team; reduced manual processing time across all departments

Real Estate & Utility Billing System (CMIS + Web Migration) *Python · PHP · GTK*

- Built desktop app (Python/GTK) for property inventory, buyer management, and payment processing
- Migrated to scalable PHP web platform with e-SOA email delivery — cut operational costs significantly
- Developed automated billing engine for utilities and POS module; improved billing efficiency by 60%

Subdivision Amenities Booking & QR Gate Pass System *Laravel · MySQL*

- Architected multi-tenant system using PHP Laravel for multiple subdivision properties
- Developed online booking module for amenities (clubhouse, tennis courts, pools)
- Implemented QR code generation and gate access validation; led 4-developer team end-to-end

Reporting Dashboards & DB Migration Tools *Chart.js · Python · PostgreSQL*

- Built automated MySQL-to-PostgreSQL migration tools with validation and error handling
- Created real-time BI dashboards using Chart.js and Bootstrap for management decision-making

SKILLS

Backend

- Python (GTK/Glade)
- PHP (Native PHP, Laravel)
- REST API Design & Integration

Database & Data

- MySQL, PostgreSQL
- Database Design & Optimization
- Data Modeling & Reporting

Frontend & Tools

- HTML, CSS, JavaScript, Bootstrap
- Chart.js, Responsive Web Design
- Git, System Architecture, Debugging

EDUCATION

Bachelor of Science in Mathematics, Major in Computer Science *2012 – 2016*

Bulacan State University
